UTAH STATE UNIVERSITY'S CEREMONIAL MACE

The top of the mace depicts a flame of crystal tinted with Aggie blue and modeled after the "lamp of learning," the classical symbol of knowledge and freedom. Imbedded within it is a brushed copper disk emblazoned with the University's seal.

The copper bezel below this crystal has 13 sunstones set into it. These symbolize the 13 presidents who guided the institution through its first century.

The white oak shaft comes from wood that was originally part of the banisters of Old Main and rescued from the building after the fire of 1983.

The base consists of limestone provided by the Church of Jesus Christ of Latter-day Saints and taken from the same quarry that was used to build the Logan Temple.

Thus, the mace represents the essence of our land-grant institution: seated in the bedrock of our community, striving and growing ever higher, crowned by the light of learning.

A Brief History of Maces

Maces have long been part of academic heraldry, though their function was not ceremonial. Originally weapons of war, maces are featured often in ancient Egyptian art where kings are shown ritually smiting their foes. This original function has not been entirely lost. Campus officials in the Middle Ages more than once kept students in line by employing their university's mace

in a manner recalling its primitive function. Even in the modern age, it is not unknown for a university mace to be used in this way. For instance, during the commencement ceremonies at Cornell in 1973, when a professor of medieval studies who was carrying the university's mace in a procession was confronted by protesters, he wielded his academic training and the mace in its original fashion.

But university maces today are, for the most part, treated as decorative emblems symbolizing the institution's authority. Seen most often at commencement and other solemn occasions, they remind those in attendance of the deep traditions inherent in a student's journey through university studies. Like the word for the ceremony itself, "commencement," — which admonishes its participants to remember that this is a celebration of beginnings, not endings — the mace turns the eye forward to the life to come by recalling the rich academic heritage of higher learning and the promise of attainment that comes through education and self-betterment. Our mace, thus, combines elements of both the old and the new, traditional features like gems and stone enhanced with modern designs such as arcs of faceted crystal. Both an impressive work of art and a hallmark of the university's history, this mace brings to light everything that is best about Utah State University.

ACADEMIC HERALDRY

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system that all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree

has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture, *Maize*
Business, *Drab*
Education, *Light Blue*
Engineering, *Orange*
Humanities, Arts, &
Social Sciences, *White*
Natural Resources, *Russett*
Science, *Gold-Yellow*
School of Graduate Studies, *Black*

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of

the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap that resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession The commencement procession originates at the Nelson Field House and the line of march proceeds to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

A MESSAGE FROM PRESIDENT STAN L. ALBRECHT

Congratulations, graduates. Note that I didn't use the term "students." Instead, for the first time with many of you, I am honored to address you as graduates.

Please keep in mind, however, that I am not relieving you so quickly of your duty as a student. There is much still to learn in this world, as you well know. There is much also to teach, and it is with great hope that I wish you well on your travels forward as you bring what you've learned here out to the world.

These commencement ceremonies are, for me, an affirmation of human potential, an affirmation of hope for communities everywhere. You sit in this building today, ready to take flight, ready to soar to new heights. Well, I take flight with you. Utah State University takes flight with you as your accomplishments grow.

We have taught you the details of your chosen professions. You signed up for those classes (whether you wanted some of them or not!). But we hope we've also instilled in you other ideals, some of them "educational." I hope we've fanned the fires of caring, of giving, of taking responsibility. I hope we've cultivated passion, adventure, understanding. You are a different person today than you were four years ago when you first trudged up Old Main hill. And I will take a sure bet and say you are a better person than you were those few short years ago.

Graduation is a time – for me and for all of us in the university community – to reflect with pride on what we have chosen to do with our own lives. You are that reflection, and today I say thank you for what you have given us, what you have given yourselves, and what I sense that you will give to society.

We will follow your progress with great expectations, and we will not forget you. Please keep in touch.

Stan L. Albrecht

Commencement Speaker
C. PETER MAGRATH

C. Peter Magrath has dedicated his professional life to the betterment of the many state and land-grant universities across the country. As immediate past-president of the nation's oldest higher education association, the National Association of State Universities and Land-Grant Colleges, from 1992 through 2005, he represented 215 public research universities on issues of importance to the higher education community. Land-grant universities enroll more than 3.2 million students, award one-third of all bachelor's and master's degrees and grant 60 percent of the doctorates earned in the United States.

During his tenure with NASULGC, he promoted an agenda of change and renewal for public higher education, particularly stressing the recognition and expansion of public universities' engagement with their localities, states and the nation. Dr. Magrath was president of three universities, the University of Missouri, the University of Minnesota and the State University of New York at Binghamton.

He has a broad perspective on higher education issues, including a long history of leadership in international education activities. The author of numerous books, monographs and articles on American constitutional law and history, higher education and international affairs, Dr. Magrath has been active on many national higher education commissions, task forces and committees.

He has served on the Commission on the Future of the National Science Foundation and on the board of directors of the Salzburg Seminar. Dr. Magrath organized the Kellogg Commission of the Future of State and Land-Grant Universities that promoted an agenda of change and renewal in higher education. A political scientist with a bachelor's from the University of New Hampshire and a doctorate from Cornell University, Dr. Magrath currently serves as a senior advisor to the College Board in Washington, D.C. For a life of leadership and contributions to higher education, Utah State University is proud to bestow upon C. Peter Magrath the honorary degree, Doctor of Humane Letters.

Since joining Utah State's faculty in 1983, DeeVon Bailey has developed a reputation as a vigorous, thorough and insightful researcher. Around the world, Dr. Bailey is regarded by colleagues and industry professionals as one of the top researchers in the fields of food traceability, agribusiness, and the economics of production agriculture. Bailey's work in food traceability is particularly important now, as the possibility of avian flu and mad cow disease pose threats to our food supply. His prominence in this vein of research has placed him not only at the forefront of academic discourse, but of policy discussions as well. He has been called to testify before Congressional committees and chair prominent research initiatives, including the National Animal Identification System, which was implemented in 2004. He received his bachelor's and master's degrees in agricultural economics from Utah State University. He earned his doctorate degree at Texas A&M University in just 26 months, a feat that still impresses his former professors. Dr. Bailey has served as principal investigator for more than 50 research projects, sponsored by organizations such as the U.S. Department of Agriculture, the Western Center for Risk Management, the Utah Department of Agriculture, and numerous industry groups. The total value for these projects is more than \$3 million, which is an extraordinary figure in the area of social sciences. Dr. Bailey is very well published and is cited by research colleagues frequently. He has published over 30 refereed journal articles, and more than 100 other academic publications. Since 2000, Bailey has presented 26 papers at professional meetings and has also served as editor of the *Journal of Agricultural and Resource Economics* since 2004. For his outstanding contributions to research, Utah State University is proud to award DeeVon Bailey the 2006 D. Wynne Thorne Research Award.

Edmund D. Brodie, Jr., is a Professor of Biology. Dr. Brodie's academic and research career spans more than 35 years. He served 10 years as head of the Biology Department at Utah State University. Throughout his teaching experience, he has mentored more than 40 graduate students who have themselves undertaken roles in teaching and research at other universities or in industry. As a teacher and mentor, Dr. Brodie takes the time to provide advice and insights into the life as a scientist, informing students about how and what it takes to succeed in science. One of the most striking features of Dr. Brodie's mentoring style is his willingness to lead by example. He is always willing to assist in any phase of a project. He encourages his students to publish their research results, and he holds group review sessions of student

writing to ensure quality. The review sessions help students improve the probability of acceptance of their manuscripts, thus ensuring competitive vitae when students begin their own careers. Dr. Brodie's personal achievements in science illustrate his ability to analyze issues and to design critical experiments to address scientific questions. He includes his students in his scientific pursuits and encourages them to develop their own interests. Dr. Brodie is also a willing and able advocate for students. TEACHING EXCELLENCE AWARDS

Through an extensive selection process involving both students and faculty in the various academic colleges, seven members of the faculty have been designated for special recognition for excellence in teaching representing the seven colleges of the University: Agriculture; Business; Education; Engineering; Humanities, Arts, & Social Sciences; Natural Resources; and Science. From among the seven, The Eldon J. Gardner Teaching Award recipient is chosen; the six remaining follow:

COLLEGE OF AGRICULTURE

Rhonda L. Miller

Rhonda L. Miller is an Associate Professor in the Agricultural Systems Technology and Education Department. She received her bachelor's and master's degrees from the University of Nebraska and her Ph.D. in Agronomy from Iowa State University in 1993. After working at Utah State University as the Program Manager for USDA's Western Region Sustainable Agriculture Research and Education program from 1994-1999, Dr. Miller joined the Agricultural Systems Technology and Education department as an Assistant Professor. Dr. Miller believes that all students should grasp the interrelatedness of agriculture, science and society. She has taught five different courses at Utah State University. Four of the courses are at the undergraduate level and meet additional University Studies requirements. Dr. Miller also contributes to the university community through conducting research related to environmental quality impacts of agricultural practices and in Extension by overseeing the AgrAbility of Utah program. A few of the terms used by students describe Dr. Miller and her courses include: "excellent," "enthusiastic," "practical" and "awesome."

COLLEGE OF BUSINESS

Cindy Durtschi

Cindy Durtschi is an Assistant Professor in the School of Accountancy. Dr. Durtschi has made an intensive effort to bring innovative, quality instruction into her classroom to prepare students for the real world of accounting. Her teaching specialty is forensic accounting, where students interact through problem-based learning that simulates the environment surrounding a fraud investigation. Student comments applaud Dr. Durtschi's exhaustive efforts in class preparation that ensure the success of her forensic accounting case, as well as the resources she provides to offer a hands-on experience in investigative methods that are vividly realistic. Her published case, "Tallahassee Bean Counters," has been adopted by a number of institutions around the country and was recently awarded the "Innovation in Audit Education Award" by the American Accounting Association (AAA). Dr. Durtschi is also very active in educational research and in the development of pedagogy and teaching support tools. In addition, she is active in various forums to maintain and enhance her professional skills, such as the Deloitte Trueblood Seminars for Accounting Professors.

COLLEGE OF ENGINEERING

Gary Green

Gary Green joined the Engineering and Technology Education Department as an Aviation Technology Lecturer in 1999 bringing 27 years as a pilot and instructor to the professional pilot program. During his seven years in the Air Force and 20 years with commercial airlines, he became an FAA designee as well as a standards captain and line-check airman. He is very highly recommended by ETE students and the department for the skills he brings to the program. Department Head Maurice Thomas said Professor Green "is very dedicated to the success of the students and does what it takes to see that students succeed. He wants to see them all meet their goal of becoming pilots." One student had this to say: "Gary brings more into the classroom than just his aviation knowledge; he brings in humor, a fun learning atmosphere, a positive attitude, a love for flying and a positive outlook that we can all succeed in the competitive

field of aviation. Professor Green possesses all of the qualities of an outstanding teacher, and is a valued member of the ETE Department faculty.

COLLEGE OF HUMANITIES, ARTS, & SOCIAL SCIENCES

Brock Dethier

Brock Dethier is an Associate Professor in the Department of English. He has spent most of his career teaching writing and training teachers of writing. After earning his Ph.D. in English Pedagogy from the University of Virginia, he spent 19 years as an adjunct at the University of New Hampshire before coming to USU in 1997. A member of the English teaching faculty, Professor Dethier directs the English 2010 program and teaches Teaching Writing and Teaching Literature courses for undergraduates. He strives to make writing courses relevant, practical and fun, encouraging students to find and explore topics that interest them. In his four books and numerous articles, Professor Dethier has championed general education writing courses and the often under-appreciated graduate students and adjuncts who teach them. His books address composition teachers, helping them to feel more confident and better prepared and to value the importance of what they teach. As one of his ex-students wrote, "Brock helped change my life in profound ways. Even after seven years, I still distinctly remember and use what I acquired from his classes, in my writing, in my teaching and in my life."

COLLEGE OF NATURAL RESOURCES

John C. Malechek

John C. Malechek joined the College of Natural Resources faculty in 1970 and has played a very strong role in undergraduate and graduate teaching from the onset of his career. He is a recognized expert in rangeland resource management, both nationally and internationally. He is devoted to highly effective instruction and professional development. He has a profound influence on teaching in his department by providing a role model to other faculty members and to graduate students who aspire to academic careers. Dr. Malechek's goals include providing students a "real world" context for learning

about rangelands, and providing the latest technical information about rangelands, their management, and the economic, political, and cultural issues that keep bubbling up. He also seeks to be a positive role model and mentor for his students. He is actively involved in the Society for Range Management and has held numerous leadership roles within the Society. Dr. Malechek views his teaching mission in terms of the Latin word "educare," the root of the word "educate," which, roughly translated, means to bring up. "I am privileged to be involved in the 'bringing up' or 'building' of young people!"

COLLEGE OF SCIENCE

Gregory J. Podgorski

Gregory J. Podgorski is an Associate Professor of Biology. Rigorous, enthusiastic, dedicated: students and colleagues use those words to describe Greg Podgorski as a teacher. It's not surprising for Dr. Podgorski to be described in this way because, in his own words, he "deeply respects the craft of teaching." He approaches his craft by following several basic principles: respect your students; clear thinking is a valuable skill that is improved with practice; teach what's relevant and current; the instructor remains a student; judiciously applied, teaching technologies are valuable; and, there's more to life than science. By implementing these principles, Professor Podgorski delivers courses that are both excellent and challenging, and he lends that expertise and enthusiasm as he contributes to biology textbooks and manuals that are used in universities and colleges across the nation. He has been a member of Biology at USU since 1988. In 1976, he received his bachelor's in Biology from St. Michael's College and both his master's in Biophysics and Ph.D. in Molecular and Cellular Biology from The Pennsylvania State University in 1979 and 1983, respectively. During 1983, he was a postdoctoral research fellow at the Max-Planck Institute for Biochemistry in Munich, Germany, and he was a research associate from 1984-1988 at Columbia University in New York City, N.Y.

DEPARTMENT TEACHING EXCELLENCE AWARD

LANGUAGES, PHILOSOPHY, AND SPEECH COMMUNICATION

With 30 faculty members, five separate majors, five stand-alone minors, and a graduate program, the Department of Languages, Philosophy, and Speech Communication is surely one of the most complex on campus. Its faculty members have many different approaches to teaching – some traditional and others more revolutionary – but they all have found effective ways to introduce Utah State University students to worlds that are far more complex, diverse, and challenging than any they had previously known. In this department, one will find students learning Russian grammar, writing Japanese calligraphy, studying Aristotle, discussing medieval French literature (in French), analyzing cross-cultural differences, designing communication studies and experiments, reading Nietzsche, building straw-bale homes in Mexico, performing plays in German, thinking through ethical issues raised by biotechnology, giving public speeches, and editing online professional journals in Spanish literature. The department's students have gone on to graduate study at the most prestigious institutions in the world. They have become presidents of international corporations, and they have gained high-profile jobs in government. In recognition of an ongoing commitment to fostering a culture of teaching excellence, Utah State University presents the 2006 Department Teaching Excellence Award to the Department of Languages, Philosophy, and Speech Communication.

ALMA MATER HYMN UTAH STATE UNIVERSITY

Across the quad at eventide
as shadows softly fall —
The tower of Old Main appears,
and peace rests over all.
The lighted "A" upon the hill
stands out against the blue
Oh, Alma Mater, Utah State,
my heart sings out to you.

And through the years as time rolls on,
and student friendships grow,
We'll ne'er forget the joys we had,
those days we used to know.
Thy mem'ries ever will be new,
thy friends be ever true,
Oh, Alma Mater, Utah State,
my heart sings out to you.
Oh, Alma Mater, Utah State,
my heart sings out to you.
